## Commitment to Quality and Cost Initiative (CQC)

Our experience has shown us that, while V-Scoring is a fairly straight-forward process, it has its complexities and nuances, that if not properly understood and addressed on a regular basis, cause *completely unnecessary and unacceptable* Quality and Cost events.

As such, we are proud to introduce the CQC program, to improve the Quality and Cost of your V-Scoring process, and it is based on the following principles.

---

# AccuSystems

## Commitment to Quality and Cost Initiative

### The Goals:

1. To Reduce the cost of operating the scoring department through optimizing the machine operating condition with regular factory PM service, and service and parts discounts.
2. Improve the Quality of V-Scoring through regular and proper machine calibration.
3. To further enhance cost and quality improvements through proactive operator evaluation and training.

---

# AccuSystems

## Commitment to Quality and Cost Initiative

### How it works:

1. A factory technician will perform our 70+ point inspection, preventative maintenance and calibration on your machine (typically taking 3-6 hours on average) on an annual or semi-annual schedule.
2. Notes will be taken and documentation of condition and minor repairs parts that were required will be provided.
3. Recommendations and training will be provided based on any documented issues found.
4. A Calibration sticker will be provided documenting the date of service and the next scheduled service date.

## Commitment to Quality and Cost Initiative

### Implementation and Cost:

1. Sign up for an annual or semi-annual PM CQC contract.
2. The Annual contract provides a flat rate cost for one (1) PM service call per year, and a 10% discount on that PM, and on all parts purchased during the contract period. **CQC-1**
3. The Semi-annual contract provides a flat rate cost for two (2) PM service calls per year, and a 20% discount on the PM's and all parts purchased during the contract period. **CQC-2**
4. The Contract Cost is a flat rate, covering all standard travel and labor costs. Contract cost depends on geographic region – contact AccuSystems for the rate for your region. Parts, Travel and Labor required/requested beyond 7 hours on site on AS-200 Series (4 hours on AS-100/150 Series), or spanning more than one day are extra. Above discounts apply to additional parts and labor, but not additional travel costs.
